

O I L - O N L Y A B S O R B E N T R A N G E

Absorbs oil. Repels water. Floats.

100% polypropylene sorbents for mining, automotive, marine & heavy industry

THE COMPLETE RANGE — MANUFACTURED IN-HOUSE

15× its own weight in oil

FLOATS even fully saturated

OIL-ONLY ABSORBENT PADS

The everyday workhorse.

Drop-anywhere absorbency for drips, leaks and wipe-downs — plain or bonded, in seven constructions.

01

PADS

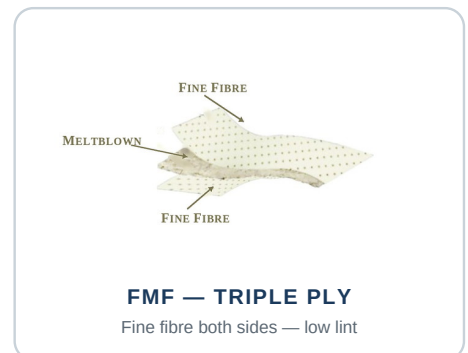

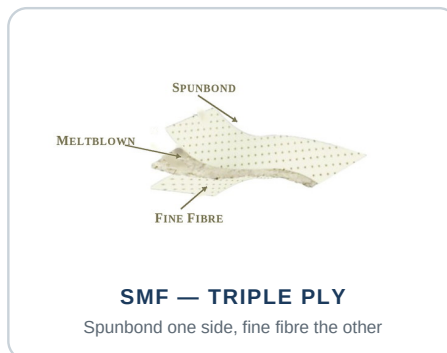

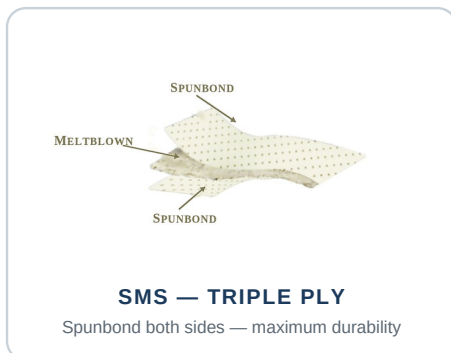

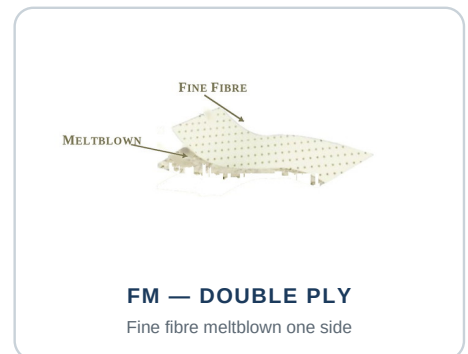

Perforated oil-only pads

APPLICATIONS

- ✓ Machine drips, leaks & overspray
- ✓ Wiping tools, parts & hands
- ✓ Under vehicles, gearboxes & presses
- ✓ Workbenches & assembly lines
- ✓ Drum-top dispensing stations
- ✓ Lining drip trays & repair zones

SEVEN CONSTRUCTIONS — PICK YOUR BUILD

PRINTING AVAILABLE ON THE SPUNBOND LAYER

Perforated or non-perforated

Custom sizes, GSM & colours

Absorbs up to 15× its own weight

OIL-ONLY ABSORBENT ROLLS

Cover metres, tear off inches.

Continuous meltblown protection for aisles and large areas — perforated to tear off exactly what the job needs.

02

Meltblown oil-only roll

APPLICATIONS

- ✓ Lining aisles, walkways & ramps
- ✓ Large-area cover under plant & conveyors
- ✓ Tear-off dispensing at workstations
- ✓ Under vehicles & fleet maintenance bays
- ✓ Lining shelves, benches & drip trays
- ✓ Temporary flooring during servicing

ROLLS

TEAR TO SIZE · SAME SEVEN CONSTRUCTIONS

PERFORATED EVERY STEP

No knives, no ragged edges — clean hand-tear at every perforation line.

White & blue standard · any custom colour

15×

ITS OWN WEIGHT IN OIL

Custom widths, lengths & GSM — slit and wound to your spec.

BUILT IN ANY OF THE SEVEN PAD CONSTRUCTIONS

Slit to any width · wound to any length · GSM to your specification

OIL-ONLY ABSORBENT SOCKS

Bends where the leak lives.

Flexible meltblown-filled tubes that mould around machine bases, corners and drains to stop oil where it starts.

03

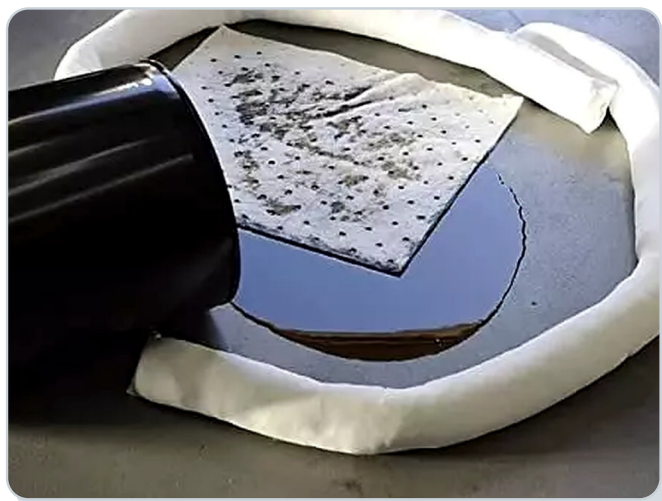

Flexible oil-only socks

APPLICATIONS

- ✓ Encircling machine bases & sumps
- ✓ Moulding around corners & drains
- ✓ Damming and diverting small spills
- ✓ Valve, flange & pipe-run drip lines
- ✓ Doorway & threshold barriers
- ✓ First line around drum stations

SOCKS

Sock ring containing a live oil spill

FILLED TO YOUR SPECIFIED WEIGHT

Length, diameter and fill weight built to your order — light wipe-up socks to heavy perimeter dams.

ULTRASONICALLY WELDED — NEVER STITCHED

Fused seam — sealed, full strength saturated

No needle holes for oil to escape, no loose threads near machinery.

Stitch holes leak & fray under load

OIL-ONLY ABSORBENT PILLOWS

Big capacity in a small footprint.

High-volume meltblown fill for persistent drips and slow leaks — where a pad is too thin and a drum is too much.

04

High-loft oil-only pillows

APPLICATIONS

- ✓ Persistent drips under presses & gearboxes
- ✓ Inside drip pans, trays & sumps
- ✓ Under leaking valves & fittings
- ✓ Catchment in pits & tight spaces
- ✓ Standby absorbency at transfer points
- ✓ Overnight leak cover between shifts

FILLED TO YOUR SPECIFIED WEIGHT

Pillow size and fill weight to your order — from compact drip catchers to heavy sump pillows.

WHY A PILLOW?

- Holds far more than a pad in the same footprint
- Loft keeps oil locked in the core, not on the surface
- Sits firm under drips without tearing or matting
- Swap-and-drop replacement in seconds

ULTRASONICALLY WELDED — NEVER STITCHED

Fused seam — sealed, full strength saturated

No needle holes for oil to escape, no loose threads near machinery.

Stitch holes leak & fray under load

OIL-ONLY ABSORBENT BOOMS

Contain it. Then recover it.

Netted, high-capacity booms that ring a spill on water, absorb the hydrocarbon and leave the water behind.

05

Netted oil-only boom

APPLICATIONS

- ✓ Containing & recovering spills on water
- ✓ Harbours, ports, rivers & lakes
- ✓ Ringing vessels during bunkering & transfer
- ✓ Protecting drains, intakes & outfalls
- ✓ Linking end-to-end into long chains
- ✓ Standby stock for spill-response kits

FLOATS — BEFORE AND AFTER

Rides the waterline; absorbs only the hydrocarbon film.
Hydrophobic fill never takes on water — saturated booms stay afloat for clean retrieval.

BUILT FOR THE WATER

- Meltblown fill in a tough netted outer
- Fill weight and length to your order
- End fittings for linking boom-to-boom
- White fabric shows saturation at a glance

BOOMS

ULTRASONICALLY WELDED — NEVER STITCHED

Fused seam — sealed, full strength saturated
No needle holes for oil to escape, no loose threads near machinery.

Stitch holes leak & fray under load

OIL-ONLY ABSORBENT SWEEPS

Recover the sheen booms leave behind.

A continuous absorbent blanket on a welded rope line — drawn across the surface to lift trace oil and sheen.

Sweep roll with nylon tow rope

APPLICATIONS

- ✓ Sheen & trace recovery after booms & skimmers
- ✓ Harbours, ports & marinas
- ✓ Effluent ponds & tailings dams
- ✓ Stormwater channels & outfalls
- ✓ Towed behind boats or drawn by hand
- ✓ Staked across slow-moving discharge

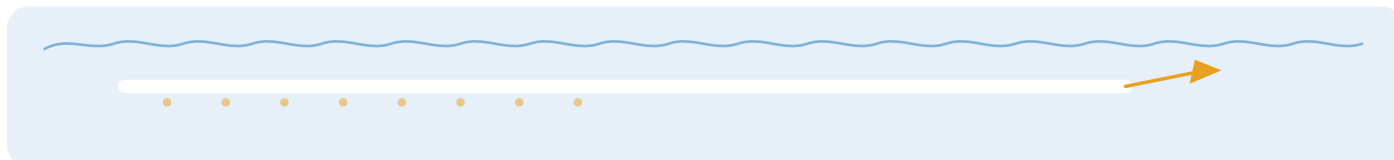

THE WELDED ROPE TUNNEL — OUR CONSTRUCTION

- PP spunbond tube, ultrasonically welded along the edge
- Nylon tow rope runs the full length inside the tunnel
- Meltblown oil-only absorbent blanket
- The rope takes the towing load — not the absorbent

SWEEPS

DEPLOYMENT

Deployed after the bulk spill is recovered, the sweep lifts the thin film that skimmers and booms cannot reach. The white fabric shows saturation at a glance, and the welded tunnel keeps the line intact even when the blanket is fully loaded.

OPTIONS & ORDERING

Built to your specification.

White and blue are the industry standard for oil-only — every other parameter is open.

FORMAT	CONSTRUCTION	COLOURS	SIZES & FILL	PERFORATION & PRINT
Pads	Plain or bonded (7 options)	White · Blue · Custom	Made to order	Perforation & spunbond print
Rolls	Plain or bonded (7 options)	White · Blue · Custom	Width, length & GSM to order	Perforation & spunbond print
